In-House Cardiology Referral

Referring a patient to an external referral centre may sometimes represent a frustrating experience both for the client and the referring veterinary surgeon. Arranging an appointment and collecting all the necessary paperwork can be time-consuming and this can often discourage Vets from referring cases. Furthermore, many clients are not willing to travel and they would rather prefer to deal with their local practice, with which they have established a solid and loyal relationship over the years.

SVCC provides a friendly and convenient mobile specialist cardiology service to veterinary practices in Berkshire and surrounding Counties. We can visit your practice and provide all the necessary diagnostic equipment to deliver the highest standard of care to your patients.

We can work together and discuss the most appropriate diagnostic investigations and the most suitable interventions for a successful clinical management of each individual case.

As cardiology specialists, we are highly trained in dealing with challenging cases and we are very happy to assist you in this difficult task.

SVCC also offers in-house training and continuing education to veterinary surgeons and veterinary nurses on all aspects of cardio-respiratory medicine. Dr Luca Ferasin (DVM, PhD, CertVC, DipECVIM-CA-Cardiology, MRCVS) is a European and RCVS Specialist in Veterinary Cardiology, with several years of teaching experience. He has been invited to speak at many national and international meetings and he is now available to organise CPDs on a variety of topics at your practice.

Please do not hesitate to contact us if you have any questions. We will be very happy to discuss any possible collaboration opportunities!
